

Motorcycling New Zealand - Mini Motocross Classes

Recently there has been some discussion with regards to the Mini Motocross classes and in particular the 7-11 years trail class. To accommodate the new bikes the 4 stroke component of this class is extended from 112cc to 125cc this is out of necessity as some manufacturers are no longer making motorbikes to the 112cc capacity.

However, you must remember that all motorcycles must be homologated and be on the homologated list before they can be used for competition. This list can be found on the MNZ website, [Mini Motocross Homologated Machines](#) the list is updated as new motorcycles are homologated, we recommend that you check this regularly.

The rules to homologate motorcycles can be found in [Appendix J](#) of the MNZ Manual of Motorcycle Sport. Applications for homologation are best made by the importer of the motorcycle, see the relevant [application form](#).
