

Motorcycling New Zealand - National Survey for MNZ Riders

Motorcycling New Zealand has endorsed a research project that is part of research through AUT and sponsored by WIL Sport. The project is around the development of riders, the outcomes of the survey and ultimately the project will help with programmes being developed in the future particularly around rider performance and safety.

We encourage you to take some time to be involved in this project by completing the survey

Please see the introduction and the link to the survey by Emanuele D'Artibale;

Hello riders. My name is Emanuele D'Artibale, and I am a sport scientist specialized in motorcycling and interested in developing specific training programs for competitive riders. As you know, a great deal of resource is spent on preparing the motorcycle for racing, however the amount of time spent on the preparation of the rider is unclear. I kindly invite you to take part in a free survey that aims to quantify how competitive riders currently prepare to compete.

This survey will take approximately 10-15 minutes for you to complete and will give you the opportunity to reflect on your preparation practices and potential areas for improvement. The group findings will be most useful for riders, coaches, trainers and motorcycling federations, who's goal is to develop and improve the performance and safety of the human side of motorcycle competitions. You have been invited to participate as MNZ have determined that you are a competitive rider and that the information you can provide will assist us in understanding how to better prepare riders to perform. Your survey participation will be completed anonymously.

Please click on this link to complete the survey:
