

Motorcycling New Zealand - New Safety Rule Effective Immediately

MNZ would like to advise the following Safety Rule, effective immediately:

A chain guard or shark fin made of suitable material must be fitted in such a way to prevent trapping between the lower chain run and the final drive sprocket at the rear wheel. **The leading edge of this guard must be a minimum thickness of 8mm and have a rounded edge to avoid this causing any injury in the event of a fall.** Machines where the swing arm shape or positioning prevents fitment are exempted (for example Yamaha R1).

This will effect the following appendices:

- Appendix B - add in 4.9
- Appendix C - change 3.11
- Appendix E - change 7
- Appendix F - change 7
- Appendix G - add in 1c
- Appendix H - change 13
- Appendix I - change 12
- Appendix J - change 3.0

Please update your Manual of Motorcycle Sport to include this rule.
